

The future landscape of European energy supply and demand will have to make much greater use of new renewable energy sources and focus more upon energy-efficient methods.

The project AlpEnergy – Virtual Power System (VPS) as an instrument to promote Transnational Cooperation and sustainable energy supply in the alpine space, has been recognized as an Official Partner of the [Sustainable Energy Europe Campaign](#) and contributes in the area of Demonstration and dissemination projects.

The Sustainable Energy Europe Campaign is a European Commission initiative in the framework of the Intelligent Energy - Europe programme, which aims to raise public awareness and promote sustainable energy production and use among individuals and organisations, private companies and public authorities, professional and energy agencies, industry associations and NGOs across Europe. The Sustainable Energy Europe Campaign wants to support these players as a European actor committed to sustainable energy.
