

The PowerPoint files from every presentation at the International conference of Mantua "**FROM ALPENERGY PROJECT TO THE NEW "CONTO ENERGIA 2011". NEW PV TARIFF AND VIRTUAL POWER SYSTEMS**

" are available
in PDF format in the download area of AlpEnergy website.

The international conference of Mantua has been an opportunity to learn more about AlpEnergy studies and results from its local developers, from electric cars as storage systems for energy produced by domestic PV plant, to the remote control of public lighting and the new possibilities related with the use of smart meters. It will give information about the new Italian PV tariff for 2011, just over a month ahead of the application of new rates and new scenarios for an electrical system which helps to turn the user from a passive to an active role.
